Inspection Checklist for 2020 DEERE 135G

Hydraulic System

- Hydraulic fluid levels: Checked, within recommended range.
- Hoses and fittings: No visible leaks or wear. Hoses are securely mounted.
- Cylinders: Fully operational with no signs of scoring or leaks.
- Auxiliary hydraulics: Fully functional, no abnormal pressure drops during operation.

Boom, Stick, and Bucket

- Boom and stick: Inspected for cracks, welds, and excessive wear. No issues found.
- Hydraulic cylinders (boom/stick): No leaks, smooth operation observed.
- Stick length: Verified as 9'11".
- Bucket condition: 36" digging bucket in good condition, minimal wear on teeth.

Undercarriage

- Tracks: 20" track shoes with rubber pads. Rubber pads are in good condition with approximately 75% life remaining.
- Sprockets, rollers, and idlers: Inspected, no signs of excessive wear or damage.
- Track tension: Properly adjusted within specifications.

Engine

- Engine oil levels: Checked, within normal operating range.
- Filters: Air and oil filters are clean and recently replaced.
- Exhaust system: No unusual noises or excessive exhaust smoke during operation.

Cooling System

- Radiator and coolant levels: Radiator is clean and coolant level is adequate. No signs of leaks.
- Fan and belts: Fan operates properly, belts are in good condition with no visible cracks or fraying.

Cab and Operator Controls

- Cab interior: Clean and well-maintained.
- Operator seat: Air ride seat in good condition with full functionality.
- Controls and gauges: All controls and gauges are operational and responsive.
- Visibility: Enclosed cab glass is intact with no cracks. Rearview camera is fully functional.
- HVAC system: Heat and air conditioning are working efficiently.

Swing Drive and Motor

- Swing operation: Smooth with no abnormal noise or hesitation.
